

No front panel should be a hostage!

Version: 0.61.3

Getting Started Guide:

Registering WebPager

January 2015

There is [five minutes video tutorial \(Tutorial 1\)](#) on the documentation page on how to register and install WebPager. These steps will be also discussed here in text version.

**Step 1:** Go to [WebPager registration page](#):

The screenshot shows a web browser window with the address bar displaying 'https://vfpssoft.com/webpager/register'. The page has a green and white logo at the top left. A navigation bar contains links: VFP Soft, WebPager Home, Demos, Purchase, Documentation, Themes, Contact, Register. The main heading is 'Register an account for WebPager'. The form includes fields for Title, First name, Family name, Organization (with example text 'ABCD Corporation, R&D department'), Email (with example text 'example@domain.com'), Create a password, and Confirm your password. A green 'Sign me up!' button is present. To the right, a 'Services' box lists: 1 Custom UI development, 2 Hosting, 3 Technical Support. Below the form, a 'What's next?' section provides a 5-step guide. The footer contains links: home, about, legal, contact, register.

Figure 1 – WebPager account registration page.

Here you should fill out the form and follow the instructions. In particular it's important to confirm the email by clicking the activation link that will be sent to you inside the registration email (fig. 2). Normally registration email will be received by you within two minutes but in certain cases this may take up to one

hour, so don't panic.

Your account **is not valid** until you confirm your email by clicking the activation link. If you think that the registration email wasn't delivered to you within one hour and it's not in the spam folder, please contact us at [webpager@vfpsoft.com](mailto:webpager@vfpsoft.com).

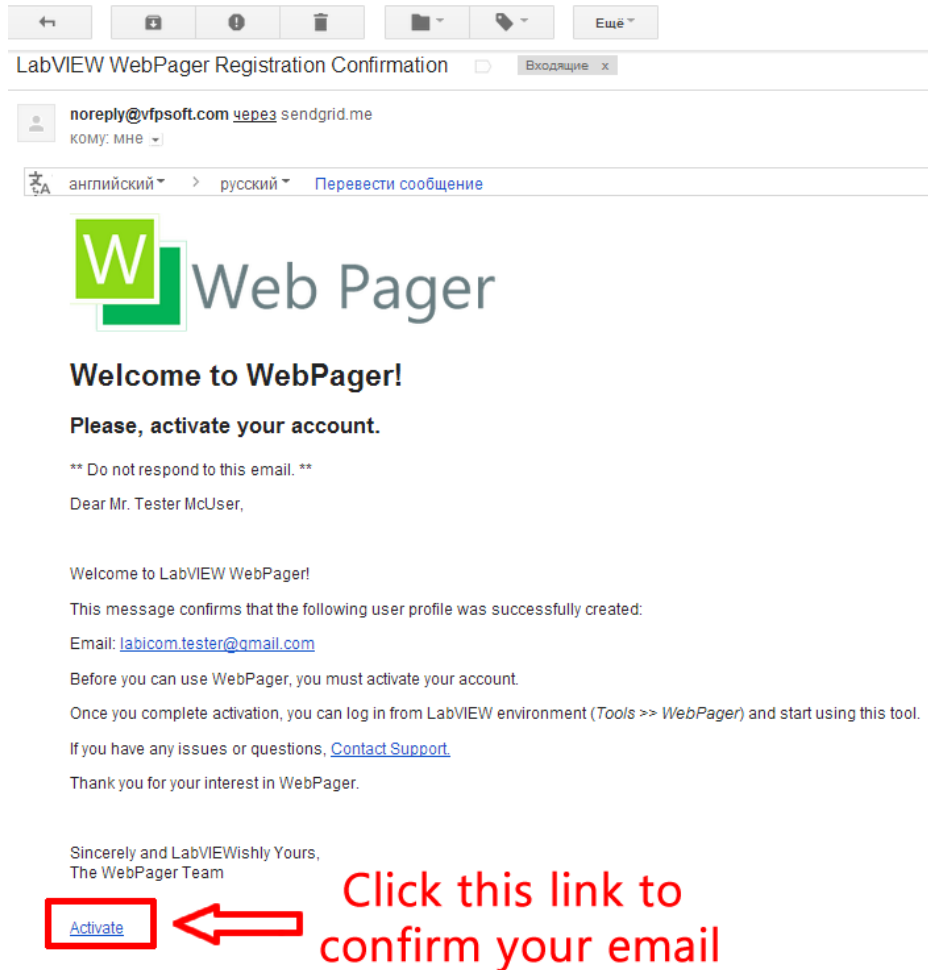

Figure 2 – Registration email with an activation link inside (in the red box on this picture, but not in real email). Exact design of the page might be different when you receive this page but it will definitively contain the activation link.

## Buying WebPager credits

Before you could buy WebPager credits and get downloader you should carefully read [end user license agreement and other legal information](#) on the 'terms and conditions' page.

Now you can go to “[Purchase](#)” page where you’ll be able to buy WebPager credits. You can choose various licenses, namely for the Internet, for LAN (local network) in development mode (WebPager with LabVIEW IDE), and for LAN in deployment mode (WebPager with EXE built with Application) (fig. 3):

**Web Pager**  
No front panel should be a hostage!

VFP Soft   WebPager Home   Demos   **Purchase**   Documentation   Themes   Contact

✓ **WebPager prices**

1 License <b>Internet</b> www address	1 Development License <b>Local Network</b> + Internet access	10 Deployment Licenses* <b>Local Network</b> + Internet access
Deluxe Functionality	Deluxe Functionality	Deluxe Functionality
Web & LAN Access	Accessible from LAN	Accessible from LAN
Normal www address	No servers needed	No servers needed
Script & FTP Upload	Free trial	Free trial
Internet Required	LAN Required	LAN Required
LabVIEW IDE/Built EXE	Works in LabVIEW IDE	Works in Built EXE
Three Technical Support tickets	Three Technical Support tickets	One Technical Support ticket
<b>\$ 4499.0</b>	<b>\$ 2499.0</b>	<b>\$ 1999.0</b>

- All plans include Deluxe Functionality:
  - multi-client access from different browsers to the same LabVIEW VI
  - multi-client access from different browsers to different LabVIEW VIs
  - extended API (VIs palette with programmatic access to various aspects of functionality)
  - possible to add custom HTML/CSS/JavaScript to your web page
  - most common LabVIEW controls and indicators are supported
- Discounts for bulk purchases.
- You can use Local Network license for publishing VIs outside LAN (in the Internet). For this you'll need to open ports on your local computer and make all other necessary changes in your computer networks.
- To use WebPager you don't need to install and run any virtual machines, servers or other irrelevant software.

**1 WebPager credit = \$1**

\* Deployment Licenses for LAN can't be purchased without at least one development license.

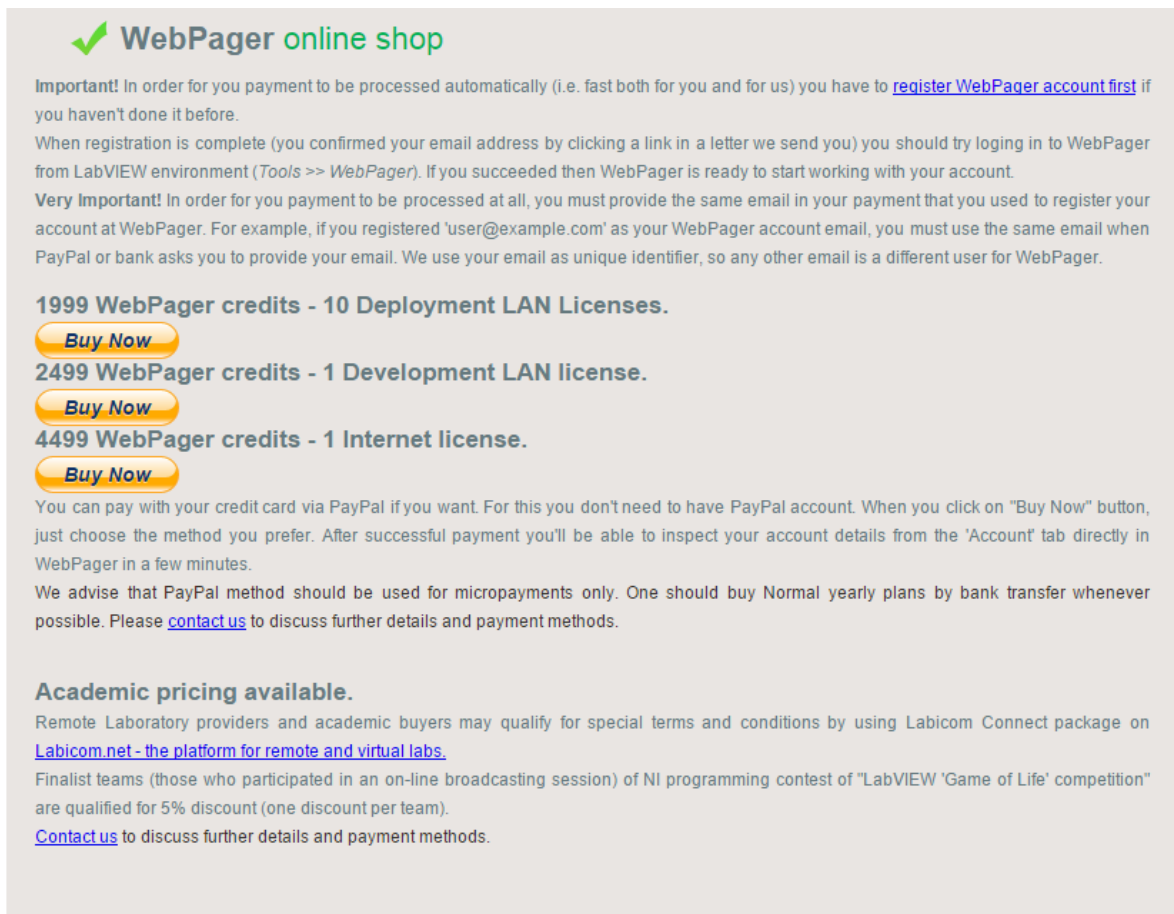

One license can be installed and used on one computer.

One technical support ticket is valid for one hour and costs \$100.

If you need any other information concerning prices and licenses, please don't hesitate to contact us at [info@vfpssoft.com](mailto:info@vfpssoft.com).

Figure 3 – WebPager prices.

If you need long-term front panel sharing then 'giga' (centurial) or 'normal' (yearly) plans should suit your needs. If you need this functionality only occasionally then there is little reason for you to buy 'normal' plans and you could go with 'nano' plans where your account is charged on minute-by-minute basis like your mobile phone for similar rates allowing making one hour demonstration of your front panel for just three dollars. And of course for all intermediate cases after 'nano' we have 'micro' (per day) and 'milli' (per month) plans. If you made your mind then there are actually a few options to make a payment. For micropayments ('nano', 'micro' and 'milli' plans) we suggest that you use PayPal for the moment. With it one could pay with PayPal account or with credit card. For 'normal' plans it's more convenient to make direct bank transfers, so in such cases please write us an email to [webpager@vfpssoft.com](mailto:webpager@vfpssoft.com). NB: At the moment we provide unlimited licenses (licenses for 'giga' plans with 'deluxe' functionality). To make a micropayment you should click one of the PayPal buttons (fig. 4):

**✓ WebPager online shop**

**Important!** In order for you payment to be processed automatically (i.e. fast both for you and for us) you have to [register WebPager account first](#) if you haven't done it before.

When registration is complete (you confirmed your email address by clicking a link in a letter we send you) you should try logging in to WebPager from LabVIEW environment (*Tools >> WebPager*). If you succeeded then WebPager is ready to start working with your account.

**Very Important!** In order for you payment to be processed at all, you must provide the same email in your payment that you used to register your account at WebPager. For example, if you registered 'user@example.com' as your WebPager account email, you must use the same email when PayPal or bank asks you to provide your email. We use your email as unique identifier, so any other email is a different user for WebPager.

**1999 WebPager credits - 10 Deployment LAN Licenses.**  
[Buy Now](#)

**2499 WebPager credits - 1 Development LAN license.**  
[Buy Now](#)

**4499 WebPager credits - 1 Internet license.**  
[Buy Now](#)

You can pay with your credit card via PayPal if you want. For this you don't need to have PayPal account. When you click on "Buy Now" button, just choose the method you prefer. After successful payment you'll be able to inspect your account details from the 'Account' tab directly in WebPager in a few minutes.

We advise that PayPal method should be used for micropayments only. One should buy Normal yearly plans by bank transfer whenever possible. Please [contact us](#) to discuss further details and payment methods.

**Academic pricing available.**

Remote Laboratory providers and academic buyers may qualify for special terms and conditions by using Labicom Connect package on [Labicom.net - the platform for remote and virtual labs](#).

Finalist teams (those who participated in an on-line broadcasting session) of NI programming contest of "LabVIEW 'Game of Life' competition" are qualified for 5% discount (one discount per team).

[Contact us](#) to discuss further details and payment methods.

Figure 4 – PayPal buttons to buy WebPager credits (1999, 2499 and 4499).

After you click one of these PayPal “Buy Now” buttons you’ll be redirected to PayPal web site where you can make the payment in a safe and certified environment (fig 5).

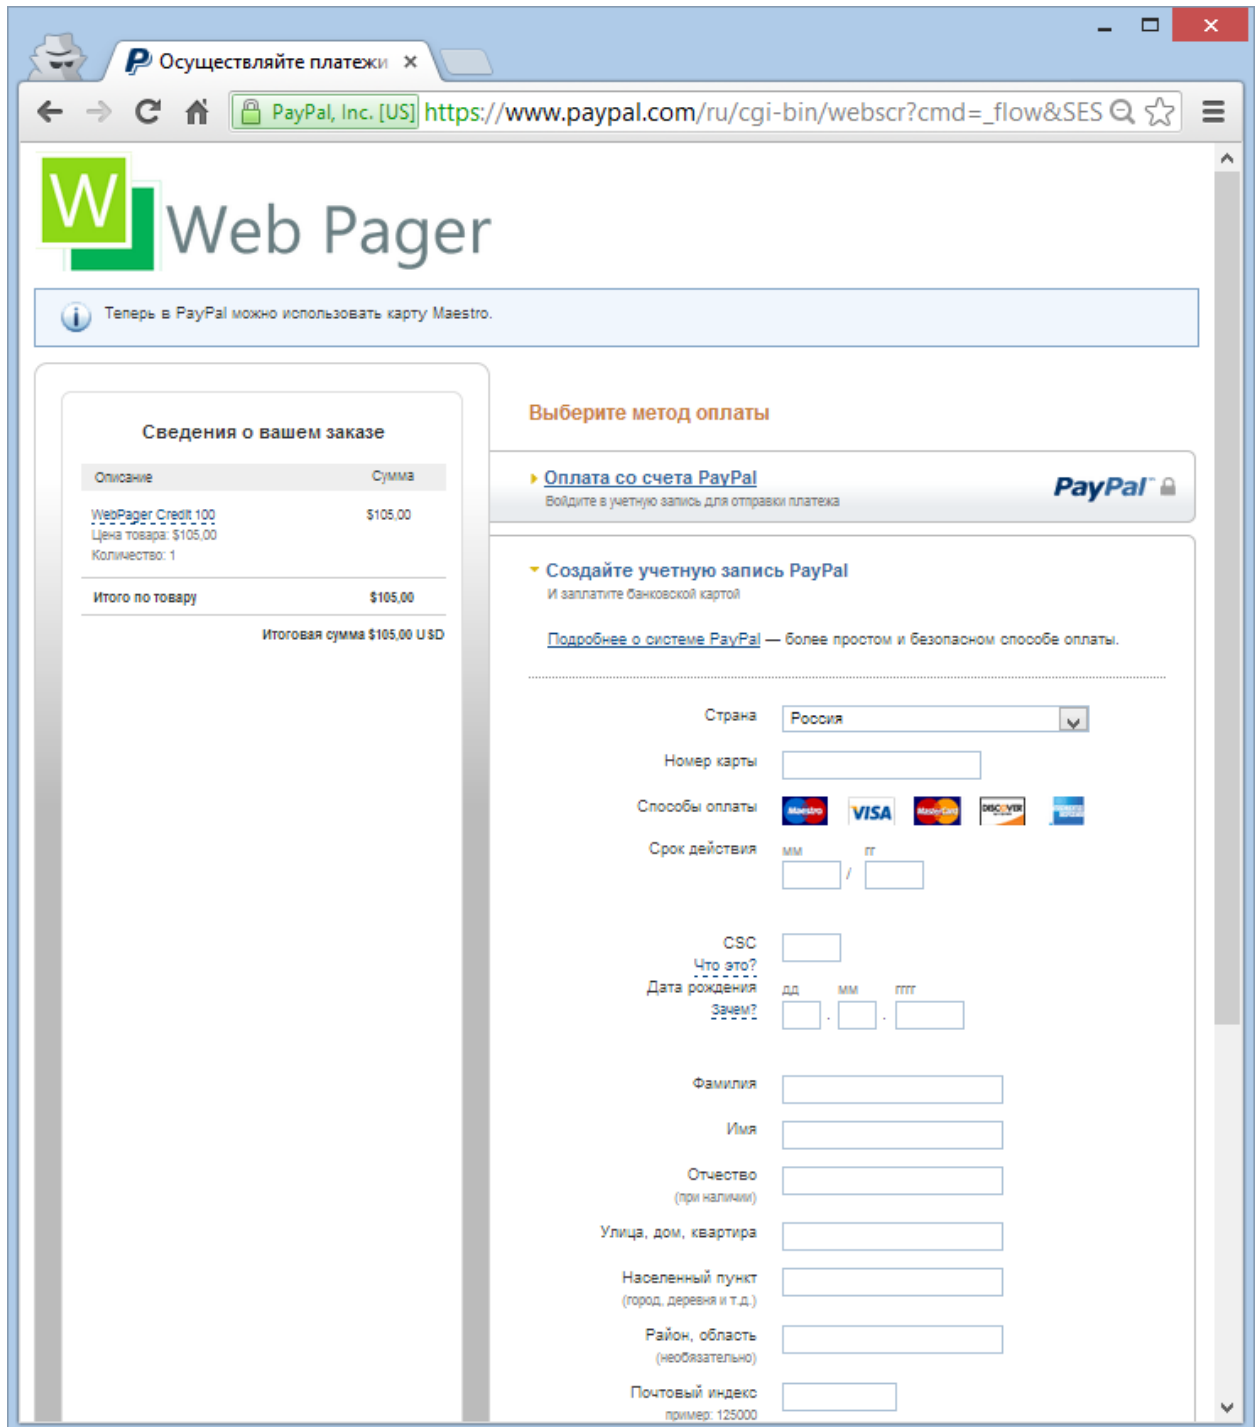

Figure 5 – Paying for WebPager credits on the PayPal web site.

After successful payment the money should be instantly available on your account (you'll know a bit later how to check it). The exact time depends on many technical things both on PayPal and on VFP Soft, with PayPal being usually the limiting factor. Usually it takes one minute for the payment to be received and processed but in some cases twenty minutes are not uncommon.

If you're in the academia, don't rush into using the software on the spot – contact us first as we'll be able to offer you special terms.

Don't forget to go through other documentation if you need it.
